

Have You Considered? Winter TIRE & WHEEL Packages

Cost Saving Benefits To Consider

- *Cost savings of dismounting and mounting and balancing tires twice-a-year*
- *Wear and tear and potential damage to tires being mounted and dismounted each year.*
- *Reduced exposure of expensive Original Equipment wheels to de-icing compounds such as magnesium chloride.*
- *Reduced potential curb damage and pot-hole damage to expensive Original Equipment wheels due to snow and ice coverage.*
- *Ability to reduce O.E. wheel diameter on some high performance packages to provide better traction and more sidewall resulting in a smoother ride and less likelihood of alignment damage due to rough snow and ice covered roads.*
- *Added resale value of vehicle with an additional set of snow wheels and tires.*
- *End-user serviceable.....saves trip to dealer when changeover is needed.*
- *Reduced cost and time at dealer should consumer choose to have dealer perform changeover service.*
- *Each of the six winter wheels shown below are fully compatible with O.E. TPMS systems. Replacement sensors are available at minimal additional cost.*

ALUMINUM WHEELS

ALPINE 402(S)
Silver
FWD 16, 17, 18
